

SPE have an ongoing development program to produce new, innovative equipment. This, along with many years of experience in the design and operation of surface preparation equipment, has been integrated with the latest computer design technology to produce the BEF 320 Heavy Duty Multiplane. It is the most advanced machine of its type.

The BEF 320 is a robust, self-propelled, hydrostatically-driven machine having infinitely variable speed control to each independent drive wheel motor. This allows the machine a forward and reverse feature which gives the machine the capability to turn around on its own axis, providing the operator with a safe, effortless operation. The cutter drum has a hydraulic raise and lower feature which provides accurate precision planing and texturing. Combined with optimum weight distribution and heavy duty cutters and drum, the BEF 320 maintains maximum cutter life with high productivity rates.
